EC.6: The accession numbers and sequences of the 965 Ligases sub-enzyme family classified into 6 sub enzyme families: (EC.6.1) Forming carbon-oxygen bonds; (EC.6.2) Forming carbon-sulfur bonds; (EC.6.3) Forming carbon-nitrogen bonds; (EC.6.4) Forming carbon-carbon bonds; (EC.6.5) Forming phosphoric ester bonds; (EC.6.6) Forming nitrogen-metal bonds. No pair of proteins in the above 6 sub enzyme families has more than 40% sequence identity. See the text of the paper for further explanation.

(EC.6.1) 496 “Forming carbon-oxygen bonds” proteins
